

INSIGHT is brilliant. One of the most useful pieces of school software we have ever had! We mainly use it for school reports and messages to parents. It has excellent features such as batch process for converting reports from Word to PDF and attaching to the student record in SIMS. The help desk acts quick and knowledgeable. New ideas are implemented quickly and usually in next release. Parents find it easy to log on to. Workload is vastly reduced during reporting periods. **OVER 90% OF OUR PARENTS USE INSIGHT.**

Helen Gant, Data Manager
Chapel-en-le-Frith High School

The reaction from parents on the **INSIGHT** product has been second to none! With continual updates, ease of use and speed, parents really have found the communication between the school and home has been improved on the back of that product being introduced into the school. Insight has a far greater level of functionality than any of the other products that we have seen out there.

Luke Nicolaou, IT Director
GLF Schools

I have always found **INSIGHT** extremely easy to access - literally one or two clicks. Once you are on the home page it's really easy to use as everything is so well set out and easily accessible. The information is super important as you can see at a glance praise points, consequences, timetables and attendance levels, as well as teachers names. It's now even better as a homework and exam information button has been added and that is so handy especially around exam times.

Parent, Heaton Manor School

INSIGHT – Access to pupil data online for parents, pupils and teachers.

Engaging parents is a powerful lever for raising a child's achievement through continual support and encouragement. Having the ability to share pupil data and interact dynamically with parents builds on the achievements in school and drives school improvement.

INSIGHT provides secure access to pupil data in your SIMS MIS, from attendance and behaviour and homework through to school reports, in a clear, easy to use and understandable manner. Now even non-technical parents can engage in their child's learning and participate in school life.

Pupils too can see information on their progress in school. In some cases the first thing they do is actually logon to **INSIGHT** to see the various information that staff have provided. Teachers too can log into **INSIGHT** to see clear and concise student information.

INSIGHT gives you the flexibility to choose the areas and depth of pupil data you wish to share with parents, pupils and teachers. Various Single-Sign-On options are available avoiding the complications of multiple passwords being used across systems. **INSIGHT** links to other software as diverse as cashless catering, to reporting from other systems external to SIMS.

How does it work?

INSIGHT is a web application hosted in school on an IIS server using standard Microsoft technologies and works on the most popular browsers conforming to WSC standards.

Access can be via your School website, VLE including Moodle with optional API links.

Features include:

- Cost neutral – eliminates costs of printing reports and posting to parents
- Syncs with SIMS creating parent passwords automatically
- Assessment, aspects, result sets, targets, reports
- Behaviour, detentions, report cards
- Cash-in pupil rewards
- GCSE options selector; writes back to SIMS
- Attendance, statutory, lesson, comparisons, examination, timetable, coursework, results
- 2 factor authentication
- Assessment manager, Profiles, PARS, pupil reporting
- Homework log with option for pupils to submit their work
- Parent usage analysis charts
- Presentation Gallery – pupils art work, photo, practical work
- Language translator
- School calendar, general documents
- Active Directory links
- Parents evening, student event booking
- Room and resource booking
- Public linked documents
- Extra Curriculum Class timetable
- Personal information, collected, validated, stored
- API links to share data
- Assessment Manager Marksheet enabling teachers to enter ASM grades writing directly into SIMS
- Link to TASC SMyle; pupil voice software and surveys
- Staff can update their own personal details online
